

RESUME

Justin Funk

Agentic AI & Enterprise CX · Denver, CO

justfunk24@gmail.com

EXPERIENCE

Agentic AI & Cloud Communications Consultant · Matrice IT Advisors

JAN 2026 – PRESENT · 8 MOS

DENVER, CO

Building full contact center environments and the agentic AI inside them, on Zoom and Dialpad — the deployment work, not the demo.

- Builds full contact center environments in Zoom from the ground up: agentic voice and chat agents, quality management, workforce management, and AI expert assist, with intent-based skill paths that hand off to connected tools and APIs
- Designs and builds agentic AI agents in Dialpad — the workflows, skills, and guardrails behind a natural, reliable experience with human-in-the-loop escalation
- Advises reseller and partner teams on aligning CCaaS and UCaaS solutions to CX outcomes across RingCentral, Twilio, Zoom, and Dialpad, with landscape fluency across NICE, Five9, Genesys, and Cisco
- Builds enablement content that accelerates partner certification and sales readiness
- Publishes CX and AI writing on LinkedIn several times weekly

Lead Financial Advisor · Northwestern Mutual / Inverness Wealth Management

MAR 2023 – DEC 2025 · 2 YRS 10 MOS

DENVER, CO

Full-cycle advisory work in a regulated, high-trust environment — and the place where I first championed an AI rollout rather than just used one.

- Championed the rollout of an internal GPT-based knowledge system, enabling a team of 10 to research across internal knowledge bases and compliance documentation
- Drove adoption through hands-on enablement, use-case development, and peer coaching — the part that decided whether it stuck
- Applied LLMs daily for meeting-note capture, client follow-up synthesis, and accelerated research, building workflow-level fluency with the tools
- Ran full-cycle, multi-stakeholder solution sales in a regulated environment, acquiring and expanding \$5M+ in assets and exceeding production targets by more than 2×
- Presented complex recommendations to executive stakeholders, translating technical detail into clear business outcomes across long, multi-decision-maker cycles

Sales Compensation Enablement & Communications Manager · Twilio

SEP 2020 – FEB 2023 · 2 YRS 6 MOS

DENVER, CO

Owned enablement and communications for the sales compensation function — the resource 400+ sellers actually opened, rather than the one that existed.

- Built and owned Twilio's most-used enablement resource on Highspot, plus a compensation knowledge wiki in Atlassian, giving 400+ sellers and managers a single self-serve source of truth
- Cut compensation-related support tickets 60% year over year
- Owned planning, content, systems audits, and end-to-end delivery across all annual and bi-annual compensation cycles
- Built dashboards and reporting for forecasting, incentive effectiveness, and performance analysis
- Partnered across Sales, Product, and Marketing on GTM initiatives, NPI launches, and field communications
- Recognized as a Values Champion and elected to the Sales Manager Council

Customer Success Manager · RingCentral

MAY 2019 – SEP 2020 · 1 YR 5 MOS

DENVER, CO

Returned to RingCentral to run enterprise customer success across UCaaS and Contact Center — the role where the adoption problem became the thing I understood best.

- Managed and grew 40+ enterprise accounts totaling \$5M+ ARR, driving adoption across UCaaS and Contact Center to 108% MBO attainment and a 9.7 NPS
- Sold one of the first RingCentral Contact Center deployments in North America — partnered with NICE — to a major enterprise account
- Owned the full customer lifecycle as primary contact across IT, operations, and executive stakeholders: implementations, migrations, and operational requests
- Ran adoption campaigns aligning feature rollouts to customer workflows, and surfaced expansion through usage analytics in partnership with Sales
- Elected to RingCentral's Customer Success Advisory Board to represent the CS team and help shape the function

Sr. Sales Enablement Manager, Head of Sales Operations & Enablement · Cloud Elements

NOV 2017 – DEC 2018 · 1 YR 2 MOS

DENVER, CO

Built the enablement and sales operations function from nothing in a hyper-growth environment. No playbook existed, so the job was to write one and then run it.

- Built a full sales onboarding and certification program from scratch — e-learning, instructor-led training, role-plays, and 30/60/90 plans — on an enterprise LMS built for scalable delivery and tracking
- Owned the sales tech stack as administrator across Gong, Docebo, LinkedIn Learning, Confluence, and Atlassian, introducing new tools through vendor research and negotiation
- Built a Sales Ops ticketing process in Salesforce, plus dashboards and reports for pipeline visibility and leadership decision-making
- Facilitated pipeline reviews and QBRs, and planned and executed the annual Sales Kickoff
- Invited to speak at the Docebo user conference in Toronto on the strength of the LMS build

Sales Enablement Manager · RingCentral

FEB 2016 – OCT 2017 · 1 YR 9 MOS

DENVER, CO

Moved from carrying accounts to building the programs that got sellers ready to carry them — onboarding across every segment, SOHO through Enterprise.

- Designed and delivered enterprise and mass-market sales onboarding across all segments, improving new-hire ramp speed and quota readiness
- Administered multiple enablement and training systems, keeping content delivery, certification tracking, and field education running at scale
- Organized and hosted an internal webinar series for ongoing field education and cross-functional alignment
- Mentored a summer intern as a direct report; earned Selling Through Curiosity certification

Signature Accounts Manager · RingCentral

FEB 2015 – FEB 2016 · 1 YR 1 MO

DENVER, CO

First RingCentral role. High-volume account management across the full customer relationship, from onboarding through expansion.

- Managed 500+ accounts totaling ~\$1M ARR, exceeding 100% quota for both new bookings and recurring revenue retention across the full year
- Owned the end-to-end customer relationship, coordinating every RingCentral project from onboarding through expansion
- Built trusted relationships through consultative discovery, issue resolution, and solutions tailored to each customer

Account Executive / Global Sales Account Manager · AT&T

OCT 2012 – MAY 2014 · 1 YR 8 MOS

ATLANTA, GA & DENVER, CO

Enterprise telecom and network solutions across a 30+ account portfolio. This is where the contact center and connectivity vocabulary became native rather than learned.

- Managed a 30+ enterprise account portfolio representing \$30M+ ARR, exceeding growth, expansion, and new-logo quotas
- Selected for AT&T's Business Sales Leadership Development Program — a rotational track admitting roughly 1 in 100 applicants — then placed on an accelerated path into enterprise account management
- Built executive-level relationships driving renewals, retention, and expansion, including full new-logo responsibility during a partner's leave
- Developed technical fluency across wireline infrastructure — MPLS VPN, T1/T3, hosted services, BVoIP

PLATFORMS

Hands-on build

Atlassian · Dialpad · Docebo · Gong · Highspot · RingCentral · Salesforce · Zoom

Landscape familiarity

Cisco · Five9 · Genesys · NICE · Twilio

The difference between those two lines is explained on the work page.
